

# 1283: My love-hate relationship with IBM Domino Plug-ins

*Teresa Deane*

*Date – January 31, 2016*

## Connect2016

The Premier Social Business and Digital Experience Conference

#ibmconnect

# Things we love to hate:

- Mondays
- Selfies
- Rude people
- Finals
- Boston Red Sox
- The Star Wars prequel trilogy

And.....

# Big Hair from the 80s

Make Every **Moment** Count

**Connect**2016

The Premier Social Business and Digital Experience Conference

# Introduction to Plug-ins

- Terminology: Plug-ins, Features, Widgets
- Functionality: What can you do with Plug-ins?
- Developer Topics
  - Development Tools: Eclipse
  - Source Code: MANIFEST.MF, plugin.xml, Activator.java, feature.xml, internationalization
- Administration Topics
  - Deployment: Security (Policies), Widget Catalog, Site Database, Third Party

# Goals

- Introduce the concept of IBM Notes Plug-ins
- Demonstrate the Necessary Tools
- Create a Simple Plug-in
- Dissect the Files
- Explain How the Files Interact
- Resource List

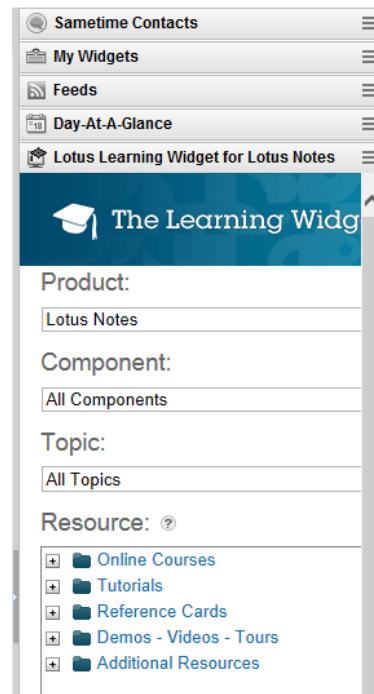

# Terminology

# What is a Plug-in?

- Manipulates the look and feel of Notes
- Add Toolbars, Menus and Actions

# Why a Plug-in?

- Use Java classes
- Call Native (DLL) files using JNI
- Reusability

# What is a Widget?

- XML file describing dynamic contributions/extensions to the Notes Client

```
<?xml version="1.0" encoding="UTF-8"?>
<site>
  <feature id="com.ibm.lotuslabs.notes.feature" patch="false"
url="features/com.ibm.lotuslabs.notes.feature_1.0.0.jar"
version="1.0.0">
    <category name="IBM Lotus Notes" />
  </feature>
  <feature id="com.ibm.lotuslabs.sidenote.feature" patch="false"
url="features/com.ibm.lotuslabs.sidenote.feature_1.0.0.jar"
version="1.0.0">
    <category name="IBM Lotus Notes" />
  </feature>
  <category-def label="IBM Lotus Notes" name="IBM Lotus Notes">
    <description>IBM Lotus Notes</description>
  </category-def>
</site>
```

# What is a Feature?

- Functionality that alters the look and feel of Notes
- Packages plug-ins for deployment
- Describes the plug-ins used
- Provides for versioning and licensing

# Example Plug-ins

- [Lotus Learn](#)
- [IBM Connections](#)
- [openntf](#)

# Development Tools

**Connect**2016

The Premier Social Business and Digital Experience Conference

# What do I need to begin?

- Eclipse

- Platform for rapid development of integrated features based on a **plug-in** model
- Eclipse for RCP/RAP Developers – Luna version
  - <https://eclipse.org/downloads/>

## Eclipse for RCP and RAP Developers

258 MB | 137,067 DOWNLOADS

A complete set of tools for developers who want to create Eclipse plug-ins, Rich Client Applications or Remote Application Platform (RCP+RAP).

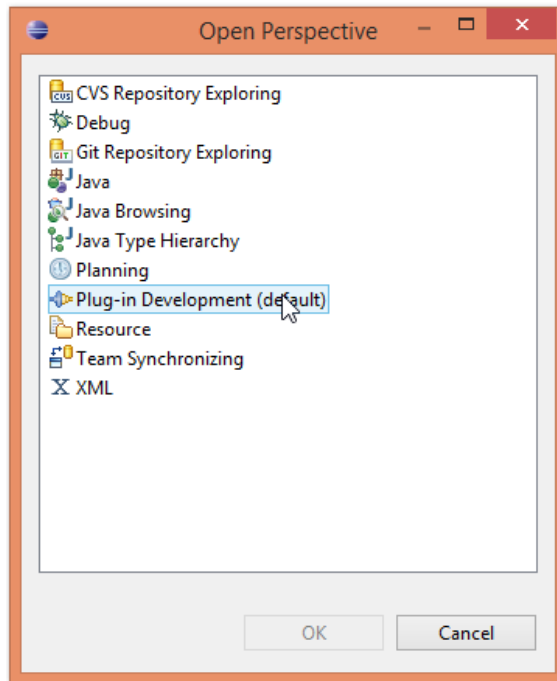

Windows  
32 bit | 64 bit

# Perspectives

- Window – Open Perspective – Other – Plugin-in Development

# How to Run Notes from Eclipse

- Version of Notes that you are developing for must be installed
- Run – Run Configurations...

The screenshot shows the Eclipse Run Configuration dialog for a configuration named 'Notes9'. The 'Main' tab is selected, showing the following settings:

- Name:** Notes9
- Workspace Data:**
  - Location:** \${workspace\_loc}/../runtime-Notes9
  - Clear:** ☒ workspace ☐ log only
  - Buttons:** Workspace..., File System..., Variables...
  - ☒ Ask for confirmation before clearing
  - [Configure defaults...](#)
- Program to Run:**
  - ☒ Run a product: com.ibm.notes.branding.notes
  - ☐ Run an application: org.eclipse.ui.ide.workbench
- Java Runtime Environment:**
  - Java executable:** ☒ default ☐ java
  - ☐ Execution environment: CDC-1.0/Foundation-1.0 (Notes9) [Environments...](#)
  - ☒ Runtime JRE: Notes9 [Installed JREs...](#)
  - Bootstrap entries:** (empty text field)

# Source Code

**Connect**2016

The Premier Social Business and Digital Experience Conference

# MANIFEST.MF

- Contains Dependencies and Services of a plug-in

```
com.abc.demo.helloworld ✕
1 Manifest-Version: 1.0
2 Bundle-ManifestVersion: 2
3 Bundle-Name: Helloworld
4 Bundle-SymbolicName: com.abc.demo.helloworld;singleton:=true
5 Bundle-Version: 1.0.0.qualifier
6 Bundle-Activator: com.abc.demo.helloworld.Activator
7 Bundle-Vendor: ABC
8 Require-Bundle: org.eclipse.ui,
9   org.eclipse.core.runtime
10 Bundle-RequiredExecutionEnvironment: JavaSE-1.6
11 Bundle-ActivationPolicy: lazy
12
```

<

Overview	Dependencies	Runtime	Extensions	Extension Points	Build	MANIFEST.MF	plugin.xml	build.properties
----------	--------------	---------	------------	------------------	-------	-------------	------------	------------------

# Plugin.xml

- Contains Extension Points

```
com.abc.demo.helloworld ✕
1<?xml version="1.0" encoding="UTF-8"?>
2<?eclipse version="3.4"?>
3<plugin>
4
5  <extension
6    point="org.eclipse.ui.commands">
7    <category
8      name="Sample Category"
9      id="com.abc.demo.helloworld.commands.category">
10   </category>
11   <command
12     name="Sample Command"
13     categoryId="com.abc.demo.helloworld.commands.category"
14     id="com.abc.demo.helloworld.commands.sampleCommand">
15   </command>
16 </extension>
17 <extension
18   point="org.eclipse.ui.handlers">
19   <handler
20     commandId="com.abc.demo.helloworld.commands.sampleCommand"
21     class="com.abc.demo.helloworld.handlers.SampleHandler">
22   </handler>
23 </extension>
```

# Activator.java

- Controls the lifecycle of the plug-in

```
public class Activator extends AbstractUIPlugin {

    // The plug-in ID
    public static final String PLUGIN_ID = "com.abc.demo.helloworld";

    // The shared instance
    private static Activator plugin;

    * The constructor
    public Activator() {}

    * (non-Javadoc)
    public void start(BundleContext context) throws Exception {}

    * (non-Javadoc)
    public void stop(BundleContext context) throws Exception {}

    * Returns the shared instance
    public static Activator getDefault() {}

    * Returns an image descriptor for the image file at the given
    public static ImageDescriptor getImageDescriptor(String path) {
        return imageDescriptorFromPlugin(PLUGIN_ID, path);
    }
}
```

# Feature.xml

- Describes a feature:
  - Plug-ins used
  - Other features used
  - Licensing information
- Products can be based on plug-ins or features

# Translating Plug-in Strings

- Source – Externalize Strings...
- Creates messages.properties file
- Adds messages.java file which contains a resource bundle accessor class to initialize and retrieve messages
- Create additional files messages\_de.properties with translated strings
- Properties files must have ISO-8859-1 encoding

# Demo Application

- Live presentation of building and running demo application

# Plug-in Security

- Desktop Setting Policy – Basics – Provisioning – Allow user initiated updates – Enable to turn off menu items in Notes

Provisioning		How to apply this setting:	Inherit from parent policy:	Enforce in child policies:
Allow user initiated updates:	Disable	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce

# Plug-in Security (cont'd)

- Security Setting Policy – Signed Plug-ins

Policy settings

## Security Settings : BCC Security

Basics | Password Management | Execution Control List | Keys and Certificates | Signed Plug-ins | Portal Server | ID Vault | Proxies | Comments | Administration

Signed Plug-in Basics		How to apply this setting:	Inherit from parent policy:	Enforce in child policies:
Installation of plug-ins that are expired or not yet valid:	Ask the user	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Installation of unsigned plug-ins:	Ask the user	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Installation of plug-ins signed by an unrecognized entity:	Ask the user	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Trust IBM plug-in signing certificate:	Always trust for install	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Ignore expiration for time stamping certificate:	Always install	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce

# Plug-in Security (cont'd)

- Desktop Setting Policy – Widgets

**Desktop Settings : BCC Desktop**

Basics | Smart Upgrade | Applications | Widgets | Dial-up Connections | Accounts | Name Servers | SSL | Applet Security | Proxies | Mail | Preferences

Widget Settings		How to apply this setting:	Inherit from parent policy:	Enforce in child policies:
Widget catalog server:		Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Widget catalog application name:	toolbox.nsf	Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Widget catalog categories to install:		Set value and prevent changes	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Enable Live Text:	Enable	Set value and prevent changes	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Show the My Widgets panel in the sidebar:		Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Restrict the creation of widgets to specific types:		<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Restrict provider IDs for installation/execution:	Disable	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Restrict extension point IDs for installation/execution:		<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Create and manage an action:	Enable	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Create and manage recognizers and content types:	Yes	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Enable default recognizers:	Enable	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Send widgets using e-mail:	Enable	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Install widgets from e-mail or other:	Enable	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Install widgets from catalog:	Enable	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce
Publish to catalog so others can browse (subject to catalog ACLS):	Enable	<input type="checkbox"/> Don't set value	<input type="checkbox"/> Inherit	<input type="checkbox"/> Enforce

# Deployment

- Site.xml – site map which explains where the feature is
- Widget catalog (nsf)
- Update site template (ntf)
- External update site (http)
- Third party tools (ClientGenie)
